TREASURY CONFERENCE 2026

Limor Carmeli · Shiran Shapira

Financial infrastructure for enterprise finance.

Meteor centralises bank data, treasury, payments and lease accounting in one system, integrated with your ERP.

400+

enterprise clients

150+

global banks, plus every
Israeli bank

1K+

ERP integrations

ISA

licensed by the Israel
Securities Authority

Why this matters in 2026.

63%

of senior finance leaders expect FX volatility to rise in 2026.

Alpha Group / Corpay, Countdown to 2026

89%

are not systematically stress-testing their FX forecasts.

Alpha Group / Corpay, Countdown to 2026

61%

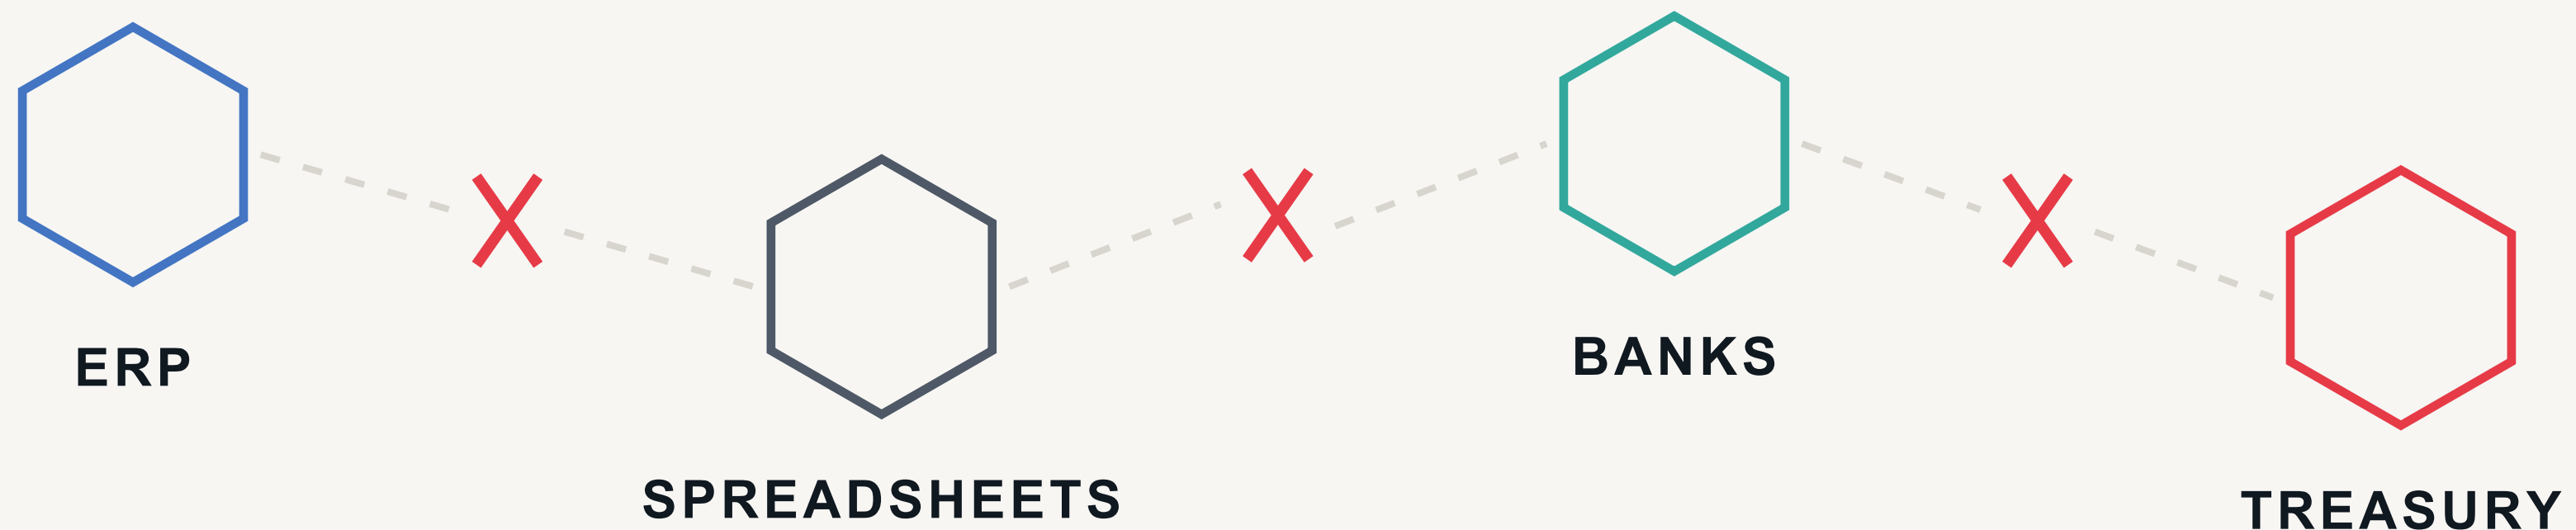

of finance leaders report finance and accounting talent shortages.

Corporate Finance & Accounting Talent Study 2026

More volatility. Less certainty. No additional headcount.

The Treasury Challenge

Decisions have to be faster. The information behind them is still apart.

FRAGMENTED INFORMATION LIMITED FORESIGHT

Balances and exposure live in banks, What is coming next still takes manual analysis.
ERP and spreadsheets.

DISCONNECTED EXECUTION

Acting on the decision is a separate process, in another system.

Connected Treasury. End to end.

SAP · Oracle · Priority · NetSuite Aggregation · Treasury · Payments · 150+ global banks · every Israeli bank · SWIFT
Dynamics IFRS 16

One system between your ERP and your banks. No re-keying in between.

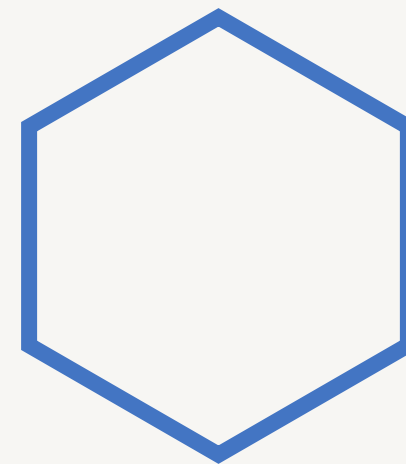

See. Decide. Execute.

The same three steps the booth is built around.

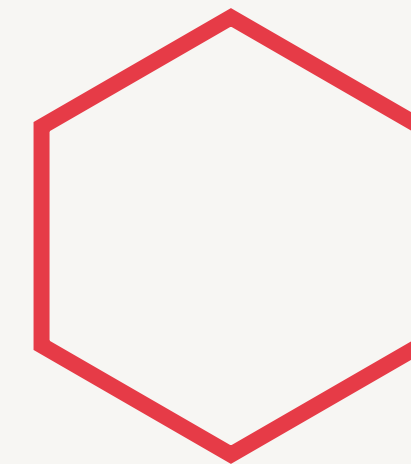

SEE

Real-time visibility across cash,
banks and ERP.

DECIDE

AI-supported insight to forecast,
optimise and plan.

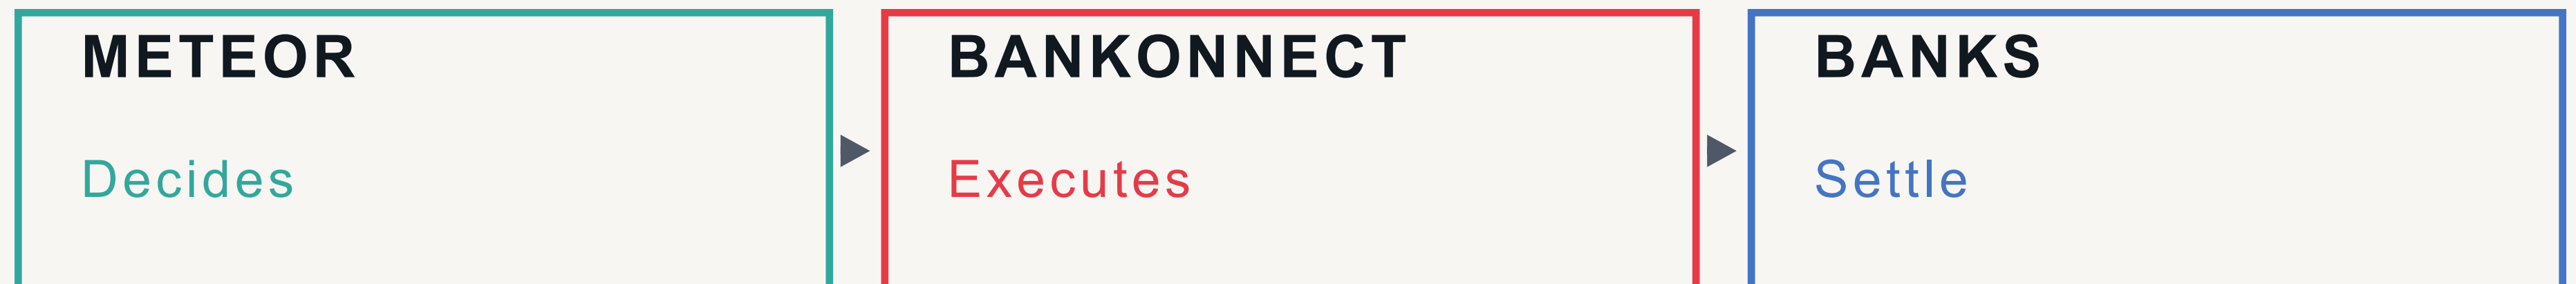

EXECUTE

From the decision to the
payment, in one flow.

Approvals, controls and a full audit trail at every step.

Execution runs on BANKCONNECT.

Meteor is the platform. BANKCONNECT is the execution layer inside it.

One layer, three jobs: bank connectivity, payment initiation from the ERP, and the approval trail behind.

You already know the name. It now sits inside a full treasury platform.

Intelligence where decisions happen.

DATA → INSIGHT → RECOMMENDATION → ACTION

Where will we face a liquidity gap in the next seven days, and what should we do about it?

AI is being built across forecasting, reconciliation and payments.

Meteor recommends. Your approvals still govern every action.

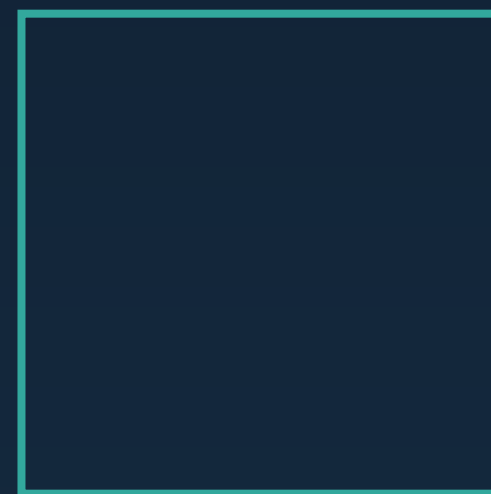

Now let's see it in action.

IN THE NEXT FEW MINUTES

- One cash position across every connected bank.
- A seven-day liquidity forecast, built from live data.
- One payment initiated from the ERP, start to finish.

Connected Treasury. From Insight to Action.
